PROJECTS

- **ONLINE CAKES AND SWEETS ORDERING SYSTEM (Using PHP)**
  Manual work takes a lot of time and a lot of other resources also. It is difficult to maintain record of all the resources. There is also a chance of damage and being misplaced. Our website tackles all these problems and issues as everything is available on our mobile phone. Our application would provide instant booking of Cakes and sweets by checking the date.

- **VEHICLE MANAGEMENT SYSTEM (Using PHP)**
  Vehicle management system is a software solution that enables the management and tracking of various aspects of a fleet of vehicles. This system can be used by various types of organizations, including transportation companies, government agencies, and private businesses.
